

# SELENIA K Cod. 1142

## DESCRIPTION

Synthetic lubricant ideal for the most modern petrol engines. Owing to its unique formula, it warrants high resistance to oxidation, the utmost protection in "stop & go" driving and outstanding performance whatever the weather.

## CHARACTERISTICS

Selenia K is the synthetic lubricant with innovative technology that warrants optimal cold starting and maximum protection also in urban driving. In "stop & go" driving, a standard lubricant suffers an accelerated stress, with the creation of sludges and consequent performance's reduction. Owing to its special additivation, based on dispersant molecules, Selenia K avoids sludges'creation. Its technologically advanced formula permits to obtain:

- | the most actual international omologation API SM that guarantees maximal resistance to oxidation, extreme protection against deposits, optimal performances at low temperatures
- | the exclusive omologation Fiat 9.55535-M2/BZ, for nwe EURO IV Fiat group FIRE engines, thanks to its 5W-40 viscosimetric range with relevant Fuel Economy features.

## ADVICE ON USE

As per OEM owner manual.

## RECOMMENDED BY

Fiat, Lancia

## TECHNICAL DATA

SAE 5W-40, ACEA A3/B4, API SN/CF,  
FCA 9.55535-M2 C.T.R.N°F214.I05, BMW LL-01,  
MB-Approval 229.5, PORSCHE A40,  
RENAULT RN0700/RN0710, VW 502.00-505.00
