

# SELENIA DIGITEK PURE ENERGY Cod. 1389

## DESCRIPTION

Selenia Digitek Pure Energy is the new fully synthetic lubricant formulated for modern petrol engines. Its particular viscosity grade and its specific formulation are able to increase the fuel economy characteristics and, consequently, the reduction of CO2 produced.

Specific formulation for the TwinAir two-cylinder engines, Selenia Digitek Pure Energy allows maximum protection of the engine even under high mechanical stress caused by severe stop and go conditions of city traffic.

## CHARACTERISTICS

The new petrol engines are able to combine excellent performance, low fuel consumption, handling and low noise thanks to the adoption of innovative technical solutions such as electro-hydraulic valves.

Selenia Digitek Pure Energy can offer considerable advantages and is the only lubricant specially formulated for new TwinAir engine.

- | Selenia Digitek Pure Energy maximizes fuel economy
- | Total engine protection also at high temperatures
- | It enhances the sporty character in turbocharged versions.
- | Very high thermal stability
- | This lubricant ensures compliance with anti pollution regulations

## ADVICE ON USE

As per OEM owner manual

## RECOMMENDED BY

Fiat

## TECHNICAL DATA
